

Due to their narrow, innovative construction, high level of user friendliness, and long service life, the HM 220 and HM 225 set the standard for quality and cost effectiveness. Their unrivaled accessibility makes ergonomic working possible - optionally from both sides - in production and series manufacture. The tried and tested greaseless slide bearing technology reduces maintenance costs, and the strong crimping force of up to 1400 /1600 kN is rated for widths up to 11/4".

Engineered solutions using quality components

Smaller machine increases ergonomics

HiLo cylinder - Maximum efficiency causing less heat

Noiseless high-quality pump

Fixed 6- o'clock die

Workpiece does not move, making it easier to position laterally

Increases productivity, driving up profitability

Reduces risk for injuries

Slide bearing technology

No greasing improves cleanliness of machine and prolongs its lifetime

Maximum productivity with very low maintenance costs

Flaking cannot stick in grease, no risk of prematurely damaging the crimping head

End product can be used in sanitary applications without cleaning

20% more capability for crimping stronger or more difficult couplings versus our competition's equivalent crimpers

Consistently accurate crimp result

CE compliant

Additional Information

The clear Control C.2 and the optional UTS software provide complete documentation of production data, including the timestamp.

The compact, narrow and ergonomic construction makes working on both sides of the workpiece pospossible.

The fixed 6- o'clock die makes safe and low-force positioning sible, which improves cost effectiveness as well as safety.
